1 Environmental Policy

1 Purpose

The purpose of this policy is to outline Cahir Environmental' s commitment to environmental Sustainability, ensuring all services are developed with minimal Environmental impact. Cahir Environmental Services management and team have evolved a deep understanding and respect for our natural working environment and as such, have become an authority on waste management services – specific to wastewater and wastewater systems.

In addition to the above and consistent with our organisation's values and environmentally conscious ethos, Cahir Environmental Services has built on our vast experience and expertise to offer unique support services to our clients who wish to maintain asset value and ensure reliable infrastructure over the life cycle of facilities. These services include;

Renewable energy technologies

Surveys & Inspections

Drain and Sewer Rehabilitation

2 Scope

The aim at Cahir Environmental Services is to achieve the highest standards of environmental performance in the interests of all our stakeholders, be they Workers, clients, the public at large or the natural environment.

3 Statement

As an organisation we are totally committed to sustainable engineering solutions, solutions which enhance and conserve the natural environment, whilst ensuring our clients receive the most functionally effective and cost-efficient solution. We recognise the critical challenge of climate change; we aim to integrate sustainable practices into all aspects of our operations and services where possible.

Strategies and Actions

- Energy Management – Energy efficiency, renewable energy, sustainable transport solutions.
- Promote Sustainable resource use. – reduce waste, reuse, recycle.
- Water Conservation - reduce water consumption.
- Environmental Awareness – promote a culture of environmental responsibility within Cahir Environmental and a commitment to climate change adaptation – building resilience into our operations and assets against increasingly severe weather, alongside our mitigation efforts.

Our goal is to promote sustainability and environmental awareness at all levels of the firm by :-

Management System	
Environmental Policy	
CESP01 1.4 Created by C Vaughan Approved by Flann Cahir	Date 17.08.26

- Complying with all applicable environmental legislation and sustainability commitments
- Measuring and analysing the carbon footprint of our business activities and continue to work in reducing it.
- Preventing pollution, meeting and exceeding all environmental regulatory requirements.
- reducing consumption of resources through waste management strategies that promote waste minimisation re-use, recovery and recycling as appropriate
- Incorporating energy efficiency measures into our office and yard and promoting efficient energy use in all areas of our business activity
- Promoting and continuing to invest in technologies that provide alternatives
- Ensure our staff are aware of the environmental impacts of their work activities and encourage them through regular awareness and training to minimise those impacts.
- Pursuing a programme of continuous improvement by reviewing our QEHS Management system and related objectives and targets, policies and practices.

4 Design and Development of Services

- Integrate environmental considerations into the design phase of all jobs focusing on energy efficiency, resource conservation and minimal environmental footprint.
- Encourage innovation in service design that promotes sustainability.
- Develop services that support environmental protection and sustainable practices for clients.
- Engage all stakeholders, employees to promote sustainable practices.
- Implement energy saving measures and water conservation. Monitor and review energy and water use.
- Reduce, reuse recycle should be always in consideration in the design process.

The environmental implications of introducing new processes and services will be carefully evaluated and cleaner technologies will be utilised whenever possible. Energy conservation, waste avoidance and waste reduction initiatives will be vigorously pursued, in accordance with the best eco-efficiency practices.

Materials and energy used or environmental impacts associated with our activities will be carefully conserved. This will be done by optimising project specifications, maximising the recycle of materials where this is feasible, operating electrical equipment at optimum levels and eliminating waste.

Cahir Environmental Services is dedicated in the fight against climate change. We believe that through proactive environmental management, we can make a positive impact on the planet while delivering high-quality services to our clients. Our environmental policy will be reviewed annually to ensure its relevance and effectiveness, adapting to new challenges and opportunities in environmental sustainability.
