1 Waste Management Policy

1.1 Purpose

The purpose of this policy is to outline Cahir Environmental Services' commitment to sustainable waste management that integrates climate change considerations, aiming to reduce of CO2 emissions. This policy aims to guide our operations, ensuring environmental responsibility, compliance with regulatory standards, and the promotion of a greener future.

1.2 Scope

This policy applies to all operations, employees, contractors, and stakeholders involved with Cahir Environmental Services.

1.3 Objectives

- Minimise waste generation.
- Maximise resource recovery through recycling and reuse.
- Reduce CO2 emissions associated with waste management activities.
- Ensure compliance with environmental regulations.
- Foster environmental awareness and responsibility among employees and stakeholders
- Incorporate sustainable design and development practices

1.4 Waste Management Statement

1.4.1 Waste Management Policy

In keeping with our environmental policy, Cahir Environmental Services Ltd is committed to reducing waste as a result of our operations by all possible means available in so far as practical. To this end we strive towards leading our industry in line with the latest waste management infrastructure regarding waste management far as reasonably practicable. All energy and material inputs, subsequent activities and project / operations management activities are carefully analysed to ensure we can reduce waste, recycle and reuse much of that which is produced from our activities.

Key Strategies

1. Waste Reduction
 - Implement waste minimisation programs to reduce the volume of waste generated.
 - Encourage the use of digital documents to reduce paper waste.
 - Promote sustainable procurement practices, favouring products with minimal packaging and longer life spans.

Management System

- Recycling and Reuse
 - Establish comprehensive recycling programs for paper, plastics, metals, glass, and electronic waste.
 - Promote the reuse of materials and equipment where feasible.
 - Partner with local recycling facilities to ensure proper processing of recycled materials.
2. CO2 Emission Reduction
- Optimise Vehicle traveling routes to reduce fuel consumption and CO2 emissions.
 - Invest in fuel- efficient and low- emission vehicles where possible.
 - Encourage the use to alternative, renewable energy sources for operational facilities.
 - Implement energy saving practices in office and facilities e.g. led lighting, energy efficient appliances.
3. Design and Development
- Sustainable service design and development.
 - Use of Eco friendly materials where possible
 - Invest and adopt innovative technologies and practices that improve sustainability and reduce waste
4. Education and Training
- Provide regular training for employees on waste management practices and CO2 reduction techniques.
 - Raise awareness about the environmental impact of waste and the importance of reducing emissions.
 - Engage employees in sustainability initiatives and reward innovative ideas for waste reduction and emission controls.
5. Monitoring and Reporting
- Monitor waste generation and recycling rates regularly.
 - Track CO2 emissions.
 - Reporting on annual emissions showing year on year
 - Set Measurable targets for waste reduction and CO2 emissions.
6. Compliance and continuous improvement
- Ensure all waste management practices comply with local, national, and international regulations.
 - Regularly review and update waste management policies and practices.
 - Adopt best practices and innovative solutions to enhance waste management and reduce CO2 emissions continuously.

1.4.2 Implementation

- Quality manager is responsible for overseeing the implementation of this policy.

Management System	
Waste Management Policy	
CESP04 Created by C Cahir Reviewed by F Cahir	Date 12.01.26

- Integrate waste management and CO2 reduction goals into company's strategic planning.
- Collaborate with stakeholders, including suppliers, customers, and local communities to support waste reduction and emission control efforts.
-

1.5 Waste Management Statement

This policy will be reviewed annually to ensure its effectiveness and to incorporate new regulations, technologies, and best practices.

Cahir Environmental Services are committed to leading by example in sustainable waste management and CO2 emission reduction, contributing to a healthier environment and a sustainable future for all.
